DETAILED ACTION

Introduction

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

2. Applicant's election without traverse of Group I (claims 1-3) in the reply filed on 11/10/2008 is acknowledged. Claims 1-3 are active. Claims 4 and 5 are withdrawn.

Specification

3. The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood:

In the Abstract and Specification page 5, the statement

“an optical filter comprising an optical film and containing an adhesive for adhering said optical film to an adherent surface on the surface of said optical film or inside said optical film”

renders the structural relationships among the layers of the claimed invention vague, indefinite, and confusing. In particular, it appears that the scope of each of the terms "said optical film" has been redefined and lacks proper antecedent basis. Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For the same reason set forth above, the scope of each of the terms “said optical film” and the structural relationships among the layers in claim 1 are vague, indefinite and confusing. Appropriate clarification is required in the next reply.
